Powder Coating
Booths

POWDER COATING CONTAINMENT BOOTHS
Front-Load w/ Disposable ASHRAE Filtration

Our **Powder Coating Booths w/ Disposable ASHRAE Filtration** are a favorite among custom coaters, job shops and manufacturers. The series is available in a wide variety of sizes ranging from **6'W-7'H-7'D to 20'W-16'H-50'D**. You are assured THE finest industrial coating booths available and include fans, motors, nut and bolt fasteners, filters, detailed drawings and instructions, all included in one single shipment.

- **Formed on CNC equipment for CAD precision!**
- **Wall panels and supporting angles are CNC PRE-PUNCHED for easy assembly!**
- **All components straight and true for PERFECT alignment. NO hand forming !**
- **NUT/BOLT construction with 5/16" fasteners for superior structural integrity.**
- **Tubeaxial fan, filters, complete hardware, light fixtures, sheetmetal and sealants are ALL INCLUDED in ONE COMPLETE SHIPMENT!**

Our disposable filter, powder coating booth series is available with a **HIGH-EFFICIENCY** 3rd stage for recycling filtered, conditioned air back into the facility, saving on heating and air conditioning costs. Stage I blanket-type filters, stage II bag-type filters are standard.

**Powder Coating Booth w/
3 stage filtration**

These are the highest quality booths available anywhere, at any price.....

Features

- Recirculates shop air – no air makeup needed!
- All Powder Containment Booths adhere to the Uniform Fire Code and the National Electrical Code.
- Fluorescent Light Fixtures as listed are U.L. and C-U.L. approved, 4' long, 4-tube. 120v
- All light fixtures are placed on the outside of 1/4" clear tempered glass, gasketed and locked in place in the working depth of the booth.
- Fan motors are 3-phase, 208/230/460 volt, 60 Hz. Single phase option available.
- Fans, motors, filters, etc. are packaged, but loose.
- Fan rated at 1 1/4 " static pressure (compare with others)
- The tube axial duct fan is specifically designed and constructed to use in powder coating booths. A precision balanced, fabricated, aluminum non-sparking fan blade moves air through the assembly. The motor, drive and bearings are isolated from the exhaust air stream.

Unauthorized service will void manufacturers warranty and is performed at the expense of the purchaser. Prices subject to change without notice. Leads times may vary. All powder system sales final. Manufacturer limited warranty applies. Replacement parts or unit replacement at the discretion of manufacturer. Equipment damaged by shipping is the responsibility of the freight hauler. Documentation of freight damage is the responsibility of the purchaser. Ovens and booths do not carry ETL certification as a unit unless otherwise specified. 15% cancellation fee. Not included: freight, taxes, permitting, regulatory review, inspections, certifications, mechanical or electrical installation, fire suppression or exhaust duct.
